Thanks to Psychedelic Trooper for his help on this mod! 1. Install TexMod. This is a mod that contains nudity.2. Copy TexMod file from download location. Make sure you extract this file first. TexMod is the file with ".tds" extension. Do not extract ".dofx" folder. This folder contains necessary information for TexMod to run.3. Go to game folder. Create new folder named after the directory you extract this file to. For example if you extract this file to the following directory: C:\Program Files\Tomb Raider Anniversary\bin\x86 then the new directory is: C:\Program Files\Tomb Raider Anniversary\bin\x86\TexMod4. Run TexMod, if you do not run it, you get the following message: "TexMod: [0] TexMod: Error. You must run the main() function of your system startup program."5. Go to the folder you just created. Run the mod.
